## Atocha Project Update

The casing leak in the HM Brian No.1 well, which was discovered while pressure testing prior to perforation is currently being rectified. An isolation packer assembly along with the tubing conveyed perforating guns to perforate the well are currently being lowered and set into position.

Perforating and flow testing of the well in the Tuscaloosa sand, at a depth of just over 17,000 feet, are planned for next week. We expect results of the perforation and flow test will also be announced next week.

### Atocha Project Description

The Atocha Project, located in East Baton Rouge and East Feliciana Parishes in Louisiana, covers 6,400 contiguous acres within the up-dip fairway of the Tuscaloosa Trend. The Tuscaloosa Trend was discovered in 1975 by Chevron. It has produced over 2.8 Trillion Cubic Feet (TCF) of natural gas and 120 million barrels of condensate over the past 32 years.

Atocha is located five miles north of BP's Port Hudson Field which is the best producing field in the trend and contains the HM Brian No.1 well which was drilled by Shell Oil in 1980 and cased to a depth of approximately 17,700 feet. Petrophysical analysis has concluded that this well contains over 125 feet of bypassed Tuscaloosa pay sand. With the benefit of hindsight and some 30 years of experience in the Tuscaloosa Trend, experts have indicated that a discovery of this calibre would be completed for production. The first Atocha prospect will be tested by re-entering the HM Brian No.1 well.

The Atocha Project area is prospective for oil and gas with a target size of 1.2 Trillion Cubic Feet Equivalent (TCFE) of recoverable gas equivalent for the entire acreage block.

Pryme has spent over US\$1.4 million on generating the Atocha project including building a significant land position, carrying out technical reviews and planning a program to test the project. Pryme is the operator of the project and has a 25% working interest in the HM Brian No.1 re-entry, half of which is free-carried, and a 3% overriding royalty on production.

### Working Interest Partners

Pryme Oil and Gas Limited (ASX: PYM)	25% (Operator)
Future Corporation Australia Limited (ASX: FUT)	50%
Promesa Limited (ASX: PRA)	25%
