## **North Sea Application Commenced and Upgraded Cefas Approval Received**

After a series of long delays the application of HCD Multi-Flow on a North Sea platform for a large national oil company has commenced. This follows Hydrocarbon Dynamics receiving Silver approval from Centre for Environment Fisheries and Aquaculture Science (Cefas), replacing the six month approval received in August 2023.

The platform being treated suffers from severe paraffin deposition issues resulting in substantial lost production. If this application proves successful, a second platform with comparable issues could follow. The previously announced Purchase Order was for approximately A\$80,000 of HCD Multi-Flow product.

Approved by the board of Directors.
